Podcast: Operationalizing Decentralized Clinical Trials

by

Listen in as experts Cheryle Evans, SVP, Global Clinical & Biometric Operations and Caroline Redeker, Senior Vice President, Corporate Development at Advanced Clinical discuss the evolution of the decentralized clinical trial model and what it means in a post-COVID landscape.

Decentralized clinical trials are here to stay. Explore both their advantages and their challenges from an operational perspective. Tune in now as experts share their perspectives on:

- ☒ The enduring, post-COVID benefits of the decentralized model
- ☒ Operational-level challenges
- ☒ Sponsor considerations in decentralized trials
- ☒ Trial management concerns
- ☒ Predictions for the future of decentralized studies
